

**Mari Kriesher, MS, LPC, CSAC, ICS**

Mari Kriesher directs the Oneida Behavioral Health Center as one of three healthcare sites across Wisconsin selected for a new DHS pilot program designed to treat eligible BadgerCare Plus and Medicaid members who have substance use disorders and at least one other health condition. The pilot uses a "hub and spoke health home" model of care, which allows sites to coordinate mental health treatment, primary care and other necessary support for eligible patients.
